Certificates

- Udemy Full Stack Course
- Coursera React Js Course
- PSEB React Js BootCamp

Hotel Management System :-

- Developed a Hotel Management System utilizing Next.js for the front-end and Node.js for the back-end.
- The system includes booking management, customer check-in/check-out, room allocation, and billing features.
- Focused on creating a responsive, efficient, and secure platform to enhance hotel operations and customer satisfaction.

All Star Driving School Management System :-

- Developed a comprehensive management system for All Star Driving School using Next.js and Tailwind CSS for the front-end and Node.js for the back-end.
- The system includes features for scheduling classes, managing student information, instructor assignments, and payment processing.
- Emphasized a responsive design, user-friendly interface, and robust functionality to streamline school operations and improve user experience.

UPVC Windows Design Software :-

- Developed a UPVC Windows Design Software utilizing React for the front-end and Laravel for the back-end.
- The software allows users to design custom UPVC windows, calculate pricing, and generate detailed specifications.
- Focused on creating an intuitive interface, real-time design rendering, and seamless integration with backend services for efficient data management.

PotSave :-

- PotSave.com provides in-person product assessment and ordering services through its platform.
- Utilizes React and Next.js for web development, Lodash for utility functions, and Tailwind CSS for styling, ensuring a responsive and efficient user experience across web, mobile applications, and software.

U of U Health :-

- U of U Health is the Mountain West's premier academic health care system, specializing in patient care, medical research, and physician training.
- Technologies used include Angular and TypeScript for dynamic web applications, Drupal for content management, and Nginx for robust web server configurations.

Flexcavo :-

- Flexcavo is the website for a construction machine rental company based in Berlin. Developed using React.js, the platform facilitates efficient rental services and enhances user experience in the construction industry.

MeetNative :-

- MeetNative is an upselling platform designed to maximize value for consumers and local businesses. Utilizes React for web development, React Native for cross-platform mobile applications, and expertise in Android and iOS app development to deliver comprehensive solutions.
